Mobile: +91-8527682523

Skills

- **Languages**: Python, C, C++, Java
- **Frameworks**: HTML, CSS, Django, React,
- **Tools/Platforms**: Nmap, Wireshark, THM, HTB
- **Soft Skills**: Team Player, Dedicated, Observant, Adaptability

Projects

- **Secure Password Manager | Python, Django | Github** *Jan 2026 - Feb 2026*
  - Built a backend system that handles user authentication and ensures each user accesses only their own stored credentials through JWT-based security
  - Developed an encrypted storage mechanism where passwords are secured using symmetric encryption before being saved in the database
  - Integrated a custom validation layer that evaluates password strength and checks against a local dataset of commonly leaked passwords
- **Intelligent CPU Scheduling Simulator | HTML, CSS, JavaScript | Github** *Mar 2025 - Apr 2025*
  - Developed a web-based CPU Scheduling Simulator implementing FCFS, SJF, Priority, and Round Robin algorithms using JavaScript.
  - Engineered real-time Gantt chart visualization to represent process execution and scheduling timelines.
  - Implemented logic to calculate key performance metrics including Average Waiting Time and Turnaround Time.
  - Enabled dynamic user interaction by supporting configurable process parameters such as arrival time, burst time, priority, and time quantum.
- **Linux System Administration Scripts (Bash Shell) | Bash, Linux CLI | Github** *Jul 2025 - Aug 2025*
  - Automated common Linux system administration tasks using Bash scripts, including login monitoring, reboot tracking, and user session logging
  - Built scripts to analyze system logs (e.g., /var/log/auth.log) for detecting failed login attempts and unauthorized access patterns
  - Configured dynamic system welcome messages by integrating real-time system data such as hostname, uptime, and last login
  - Extracted and managed user information from system files like /etc/passwd to generate structured outputs for administrative use

Certificates/Certification

- RHCSA Summer Training: Mastering Linux System Administration| LPU | Certificate *July 2025*
- Cloud Computing | NPTEL | Certificate *May 2025*
- Peer- to- Peer Protocols and Local Area Networks| Coursera | Certificate *Oct 2024*
- The Bits and Bytes of Computer Networking| Coursera | Certificate *Sep 2024*

Extra-Curricular Activities

- Engaged in 200 days of practical cybersecurity training, performing hands-on labs on Tryhackme *Nov 2025*
- Participated in Code-A-Haunt Hackathon *Aug 2025*

Education

- **Lovely Professional University** Phagwara, Punjab
  Bachelor of Technology - Computer Science and Engineering; *CGPA: 7.23* *Aug 2023 - Present*
- **Laxmi International School** Gurugram, Haryana
  Intermediate; *Percentage: 75.8%* *Apr 2022 - May 2023*
- **Laxmi International School** Gurugram, Haryana
  Matriculation; *Percentage: 79%* *Apr 2020 - Aug 2021*
